WORK EXPERIENCE

Working Student — **03/2025 - Present**
Atradius Group — **Cologne, Germany**

- Developed Python and SQL based analyses and ad-hoc reports to support global credit risk underwriting decisions.
- Contributed to machine learning based credit limit optimization, including neural networks and fuzzy logic approaches.
- Automated recurring reporting workflows, reducing manual effort for underwriting teams.
- Worked with Oracle databases and BI tools to extract, validate, and structure risk-related data.
- Delivered structured risk insights to support data-driven decision-making.

Data Analyst — **06/2023 - 08/2024**
FINCA NBCO — **Baku, Azerbaijan**

- Built customer segmentation models and risk evaluation tools using Python and SQL.
- Improved reporting automation by developing reusable scripts, reducing manual workload.
- Assisted in the creation of dashboards using Power BI and Tableau for internal stakeholders.
- Performed exploratory data analysis to identify trends and support business decisions.

Data Scientist — **03/2023 - 05/2023**
QSS Analytics LLC — **Baku, Azerbaijan**

- Created dashboards and basic predictive models using Python, Power BI, and SQL.
- Worked with cross-functional teams to interpret raw data and prepare clear visual reports.
- Focused on improving data accessibility through well-structured reporting tools.

Data Analyst — **11/2021 - 11/2022**
ANG LLC — **Baku, Azerbaijan**

- Analyzed business and operational data using Excel and Python to support planning and performance monitoring.
- Created periodic analytical reports summarizing trends and key insights for leadership.
- Collaborated with internal teams to ensure accurate and meaningful data interpretation.

EDUCATION

Master of Economics — **2024 - Present**
University of Bonn | Bonn, Germany

Bachelor of Business Administration — **2019 - 2023**
State University of Economics | Baku, Azerbaijan
GPA: 1.3
